

Clickbank Affiliates make bank with Free Ads

Did you know that if you can submit enough articles you can make a great income with clickbank for next to nothing in advertising costs?

I like to use Article Marketing for Clickbank products because:

You get an entire page to describe the products instead of 2 lines on Google Ads.

For manual article submission the cost for advertising is zero.

People actually read them, and if you write a good article you can draw a bunch of traffic.

You can use an article and build a lot of trust. The client is presold before even visiting the website sales page.

I like to use the articles to build up my website rankings in Google and promote the clickbank products at the same time!

You can be a serious affiliate for any product easily. Write an article or a review every day about a different product and then submit it to every directory you can.

This will give you a good selection of products for customers and if you articles are good a fantastic conversion and paycheck. This will give you several one page ads for nearly nothing and income through the roof.
